Subdeck	41-5024	0.91	0.76
Front Cap	39-4045	n/a ea.	0.31 ea.

SLAT TYPE

is determined by your deck spacing (distance from the center of one slat to the center of the next slat). To determine deck spacing, measure from an easy to identify point on a slat to the same point on the adjacent slat. This will provide you with the center-to-center slat dimension. Cross reference this dimension with the chart below to identify the slat type you have installed in your trailer.

Slat Type	Outside Leg to Outside Leg Dimension in	Outside Leg to Outside Leg Dimension mm
35	3-1/2"	88.9
37	3-3/4"	95.25
40	3-7/8"	98.425
